

## TOK exhibition examiner's comments

Mark awarded	9
Marks available	10

### Example C

This is a very good piece of work with three well-chosen objects used to interrogate the prompt. The points made are backed up by evidence. There is a sustained focus on connecting the prompt and the objects, and justifications for their inclusion. There is a little weakness in the specificity of the second object, which is the main reason why this exhibition was awarded a mark of 9 rather than a mark of 10.
